INDUSTRIAL PRODUCTS

FOOD PRODUCTION  
PRODUCT RANGE

## FOOD GUARD GREASE

**450G/500G**

Food Guard grease EP2 is premium white Aluminium Complex grease specially developed for the lubrication of all types of machinery used in the food processing industry. Excellent protection from corrosion, oxidation and water washout. Will assist in reducing wear under high or shock loads.

Formulation meets H-1, incidental contact with food requirements.

*Product Code: TGFG450*

## TURBO RED

**5L, 20L, 200L**

Turbo Red is a powerful, biodegradable water based heavy duty liquid degreaser formulated for effective removal of heavy grease, oil and soil deposits. Uses penetrating agents that instantly start working to eliminate product waste. Turbo Red is an alkaline based degreaser and works best when water activated. When used in food processing establishments, rinse away with potable water.

*Product Code: TTR*

## TREBLE FOAM

Treble Foam is a blend of different cleaners. It combines caustic agents, chlorine and surfactants into a single high-foam cleaner. Treble Foam also contains a special corrosion inhibitor-it's tough on protein and fat deposits but it won't harm the soft metals so commonly used in process lines. Treble Foam has been specially designed for use on equipment in busy meat processing plants.

*Product Code: TTF20*

*Available in: 20L*

## GORILLA

Gorilla is a tremendously powerful blend of chemicals specially formulated to tackle the toughest hardened food waste, greases, fats and stains from hard working ovens, grills and hot plates. It's blend of sodium hydroxide, water softening agents and penetrating surfactants means that Gorilla is equipped to take on jobs other cleaners aren't strong enough to handle.

*Product Code: GORILLA20*

*Available in: 20L*

## SILICONE LUBE - FOOD GRADE

TREBLEX Food Grade Silicone is a highly concentrated food grade silicone spray that provides a safe, thin, odourless lubricating protective coating that can be used for heavy duty applications in food manufacturing industries. It is also ideal for textile, transport and marine applications, anywhere a safer, food grade Silicone product is required that does not contain any unsafe carcinogenic solvents.

*Product Code: TSL*
