Dynalift

DESCRIPTION

TREBLEX Dynalift is a special blend of alkaline salts and detergents designed to clean hard surfaces at an extra high quality rate.

FEATURES

- Free flowing powder.
- Highly effective on concrete floors.
- Most efficient when used with hot water.
- Rinses off easily.

APPLICATIONS

TREBLEX Dynalift is used to clean hard surfaces such as concrete. It is particularly effective on fatty, greasy and oily surfaces.

Floors/Bench Tops

1. Wet the surface before sprinkling TREBLEX Dynalift lightly over the area to be cleaned.
2. Brush or scrub the surface and then rinse well with clean water (preferably hot water).

Other Surfaces

1. Mop or scrub into the surface with a solution of 5 to 10 grams of TREBLEX Dynalift per litre of hot water.
2. When complete, rinse surface well with fresh water.

SAFETY

Classified as Hazardous. Carefully read the Material Safety Data Sheet before using this product.
