

TREBLEX

Solutions for industry

PRODUCT DATA SHEET

Product Code: TFBC

FUEL BOOSTER CONCENTRATE

DESCRIPTION

TREBLEX Fuel Booster Concentrate improves power and responsiveness and improves fuel economy for all vehicles.

The fact is that all fuels have a portion of water dissolved or emulsified in them and this passes through the injectors. As long as the water in small amounts is dissolved or emulsified in nano particles in a stable solution then there is no problem for it to go through the injectors.

Treblex *Fuel Booster concentrate* emulsifies and **does not suspend the water** so the solution is completely stable and will not come out to form free water.

Treblex *Fuel Booster Concentrate* also has corrosion inhibitors added to make sure that there is no chance of corrosion occurring throughout the fuel system. One problem of emulsifying the water is that you lose some lubrication. Treblex *Fuel Booster Concentrate* has lubricants added that increase the lubricity of the fuel.

This advanced technology product provides the following benefits:

- Designed to suit all liquid hydrocarbon fuels
- Enhances cleaner, more efficient combustion
- Helps reduce bio-fouling
- Retards ageing of fuel
- Helps clean tanks and lines
- Reduces harmful exhaust emissions
- Helps neutralise acids
- Disperses moisture in fuel tanks and lines
- Helps prevent formation of unwanted deposits.

The presence of water in fuel (from, for example, condensation in the tank, leaks, etc) allows the fouling of fuel tanks, lines and filters through the propagation of biological organisms such as *Cladisporum resinae*, facilitates the formation of sulphur acids and accelerates corrosion.

Fuel Booster Concentrate has superior water uptake ability over traditional fuel additives.

Fuel Booster Concentrate is also more effective than other products at neutralizing the harmful effects of acids in aged or high sulphur fuels, and in removing existing gum, and varnish deposits as well as reducing their formation.

Diesel Power Plus allows fuel to burn cleanly and efficiently, and helps keep injectors and combustion chambers clean.

APPLICATIONS

Add *Fuel Booster Concentrate* to fuel tank.

SAFETY : Not classified as hazardous. Please read SDS sheet before use. Keep out of reach of children.

Information contained herein is accurate at the time of writing this document. However specifications change from time to time, please ensure that the specifications meet your requirements.
