

Hi Treblex Team

Thank you for giving me the opportunity to report on my experience with this product.

Are you really going to put this on your website, as if you do, my secret will be out!

Turbo Red is my "secret solution" to treat all oil and fat stains on pavers.

Just a paintbrush application of Turbo Red onto the stain, leave for a while, high pressure clean off and my job is done.

Local real estate agents call me in after their tenants have left oil stains on the garage floor and they are delighted with my results.

I didn't really want to tell anyone about my "secret solution" but I suppose I do have to share a good thing.

Yes, ok, I do highly recommend Turbo Red, but, sssshhhhhhhhh, don't tell my clients!

Ray Jarvis
