## SOLUTIONS FOR INDUSTRY

# SUPERFOAM

### DESCRIPTION

TREBLEX Superfoam is a concentrated liquid formulated for use in all air drilling operations, using either tri-core or hammer bits, encountered in the mineral exploration, oil, gas and groundwater industries.

### FEATURES

- Super concentrated
- Produces a dense, stable foam at ambient or elevated temperatures.
- Biodegradable.
- Phosphate free.
- May be mixed with water in the injection tank prior to injection into the air stream or fed directly into the water as it is injected into the drill hole.

### APPLICATIONS

Dilution rates vary according to application, but typically would be 0.05% by volume in water dust suppression, 0.2% for mist drilling and 1.5% for slug drilling.

Injection rate of the diluted product will vary with conditions

(eg: penetration rate, hole diameter and depth, ground type, water influx, etc) but typically would range from 10-90 litres per minute.

### SAFETY

This product is not classified as hazardous. Keep out of reach of children. Avoid contact with skin and eyes. Read material Safety Data Sheet before use.
