PRODUCT DATA SHEET

Product Code: TRO

RO WATER

DESCRIPTION

Treated water with impurities removed. RO water has low conductivity due to the extremely low concentration of impurities after treatment.

FEATURES

- High contaminant purification removing many pollutants including lead, asbestos, microorganisms, sediments, bacteria, fluorides, chlorides, sulphates, heavy metals, industrial chemicals, pesticides and total dissolved solids, among others..

APPLICATIONS

- Add RO water to batteries as required and according to manufacturers directions.
- Add RO water to radiators after first mixing with Treblex Concentrated Guardian Coolant at the mixing rate stated on the label.
- Use in domestic irons to prevent a build-up of impurities.

Size: 5L, 20L, 200L, 1000L

Information contained herein is accurate at the time of writing this document. However specifications change from time to time, please ensure that the specifications meet your requirements.
